

Available Operating Systems - Automated Installer

Automated Installer/ILO

If your server has ILO you can use the automated installer and operating systems listed below OR mount a custom ISO and install any operating system you'd like.

Difference Between OS Versions

With each operating system there is usually more than one option, the typical options you'll see are:

- **SDA** - The OS will be installed on the first disk only. Best option for single drive servers, or dual drive servers where you do not want to use RAID.
- **CCISS** - This is the OS with the RAID driver inserted. Use this if your server has a hardware RAID controller.
- **SW RAID/Soft RAID** - This is an option for the installer to pre-configure a Software RAID for you. Use this if you want to RAID multiple drives and do not have a hardware RAID controller.

Available OS's

Updated March 2016.

- **CentOS**
 - CentOS 5
 - CentOS 6
 - CentOS 7
- **Citrix Xenserver**
 - Xenserver 6
 - Xenserver 6.2
 - Xenserver 6.5
- **Debian**
 - Squeeze (Debian 6)
 - Wheezy (Debian 7)
 - Jessie (Debian 8)
- **Fedora**
 - Fedora 20
- **FreeBSD**
 - FreeBSD 8.2
 - FreeBSD 9
 - FreeBSD 10
- **openSUSE**
 - openSUSE 12.3
 - openSUSE 13.1
- **Ovirt Management Server**
- **Proxmox VE**
 - Proxmox VE 3.x
 - SDA
 - CCISS
 - Soft RAID 1 (sda/sdb)
- **R1Soft Bare Metal Restore**
- **Scientific Linux 6**
- **Sysrctd 4.4.0 [rescue system]**
- **Ubuntu**
 - 12.04
 - 12.10
 - 13.04
 - 13.10
 - 14.04 LTS
- **Ultimate Boot CD**
- **VMware ESXi**
 - ESXi 5.1
